

Prices

We set our prices based on you and your business requirements. We do not want to charge you for a service you do not want or need, therefore our price is unique to you. We work on a fixed fee basis, which is paid monthly. This means there are no nasty surprises for you at the end of the year as the fee is already agreed.

We think it is always worth knowing what something might cost before enquiring, therefore below are some standard packages and services we offer to clients to give you some price examples.
